

Senior Front-End Developer

Job type: Full time

Location: Peterborough

Salary: £40,000 - £50,000

Data Interchange Plc has an exciting opportunity for a Senior Front-End Developer. You will have the opportunity to take the front-end lead in a large greenfield project which is intended to replace the company's core server products with a cloud-based service. This project will use an Angular front-end, with a service-based C# .Net core back-end hosted in a Linux containerised environment using Docker and Kubernetes.

Commercial experience and high levels of technical ability will be expected in the following areas:

- Strong experience of Angular 2+
- Typescript / JavaScript ES6
- HTML, CSS / SASS
- RxJS / Redux
- Angular Modules / Webpack / Gulp

In addition to these areas you should also have experience of the following:

- Angular Material
- RESTful web services
- Front end testing experience
- GIT Version control
- Agile experience
- Front end performance enhancements

You will be educated to degree level with at least 4 years' front-end commercial experience and proven current skills in Angular (2+), JavaScript, HTML and CSS. This role is technically demanding, and the successful candidate must already have gained and be actively using excellent technical abilities in the above areas.

Data Interchange is a leading provider of electronic data interchange (EDI) and eBusiness integration solutions to over 4,000 global organisations, providing critical functionality for managing communications and data transformation within and beyond the enterprise.

Alongside a competitive salary and benefits, we also offer the following:

- Individual training budgets
- Flexitime
- Company pension
- Free parking
- Regular, subsidised staff social events

To apply for this position, please forward a copy of your CV and covering letter to careers@datainterchange.com
